AR-1 Automotive Plastic Trimming Repairs

A 2 day course designed to teach you the skills required to repair damaged interior trim and upholstery, refinishing to the original standard. This course covers plastic, vinyl, and leather materials, and refurbishing headlight lenses.

AR-2 Automotive Plastic Welding Repairs

A 2 day course designed to teach you the skills to repair automotive rigid plastic component parts and refinish to the original standard including headlights.

WA-1 Welding Plastics

Designed to give an understanding of Polymer materials and their joining techniques. Suitable for workers in plastics industry who prepare materials for welding, and need to identify non-weldable materials.
